A Passion for Pedestals

MTI Baths unveils contemporary space-saving pedestal sinks

(Sugar Hill, GA. July 28, 2017) Space is often at a premium in today's bathrooms, yet consumer expectations remain high when it comes to stylish, high-quality fixtures. MTI Baths is pleased to offer the perfect solution in the form of two new pedestal sinks that make a powerful design statement and feature a smart space-savvy configuration.

Introducing the Petra and Halo pedestal sinks. Both take their inspiration from a minimalist aesthetic and bring a chic sophistication to any modern bathroom. The Petra is a bold square column with clean angles and accommodation for a deck-mounted faucet, measuring 19" x 16 ½" x 36". The Halo is an elegant cylinder with graceful curves that comes in at 18" x 18" x 36" and is compatible with a freestanding or wall-mounted faucet.

"The market demands both form and function, especially in smaller bathrooms where there isn't space to spare," said Michael Kornowa, Director of Marketing for MTI Baths. "The Petra and Halo pedestal sinks are stunningly beautiful designs that you would choose to have in your bathroom simply because they look so extraordinary. And the fact that they are space-friendly is an added benefit allowing great design flexibility. Both are perfect for a powder room, a guest bath or a luxurious master suite."

As freestanding pedestal sinks, the footprint of both models is modest, making them a perfect fit where quarters are tight. The actual basins, however, are generously sized and practical for daily living. As part of MTI's popular Boutique Collection, both sinks are crafted from their proprietary SculptureStone™ made of mostly organic materials and hand-finished into a molded stone work of art that is extremely durable and easy to clean.
