

FOR IMMEDIATE RELEASE

A New Angle on Sink Design

MTI Baths introduces ultra-versatile Incline Counter-Sink

(Sugar Hill GA - August 31, 2017) Versatility is a hallmark of truly great design, and MTI Baths has hit the nail on the head with their latest bathroom sink – the Incline. This extraordinary rectangular basin is notable for its sharply sloped bottom which runs from the front to an integrated slotted drain along the back of the sink bottom. With its sleek minimalist lines, the Incline lends itself to a variety of installations and adds an element of modern elegance to any luxury-minded bathroom.

The Incline is part of MTI's beautiful Boutique Collection of lavatory sinks and is handcrafted of solid SculptureStone™ for a molded stone look that is durable, eco-friendly and easy to maintain. Offering exceptional versatility, the Incline can be installed as an undermount sink. It can also be ordered as a Counter-Sink or Vanity Sink, where the sink bowl is fully and seamlessly integrated. The Vanity Sinks can be specified with either Parsons-style legs or waterfall-style side on two sides or only one for design and installation flexibility. And the design options don't stop there. Customers can also specify lengths, single or double bowl configurations, and the bowl position in the center or offset to the right or left. The bowl size of the Incline is a generous 19" x 15" in either white or biscuit matte with an optional gloss finish if desired.

"The Incline is our chameleon of sink designs – it can fit in anywhere and look perfectly at home," said Michael Kornowa, Director of Marketing for MTI Baths. "The sloped bottom is quite eye-catching and adds a geometric element that is fresh and unexpected. With the different options for installation, the Incline is truly one of our most versatile products and ideal for a master suite or powder room."
